

The Innovative Safety Spray Shield Design

Representing over twenty years experience and development this new design significantly improves upon conventional shielding products.

SUREBAND Clear

All-PTFE. Outlasts conventional PTFE-coated fibreglass shields in corrosive environments

SUREBAND Steel

All-316 ST/ST banding and mesh. Suitable for high pressure and temperature applications

SAFER

Our PDT technology makes Sureband THE most effective shield design on the market. Be sure, be safe, choose FlangeGuards

QUICKER

No pull-cords. Quick-fit connection cuts install time dramatically, saving time & money. Operators are more inclined to re-fit after removal

BETTER

Best-in-class for materials of construction and performance

Original Design Pipe Safety Shields

Clear Teflon (ECTFE)

Ideal for Acid / Caustic / EI15 Oil and Diesel mist prevention

The PTFE-Clear shield is manufactured from Teflon coated fibreglass, with wide central band of clear Teflon (ECTFE). This permits visual inspection of the valve and any leaking fluid.

Material	PTFE + ECTFE
Typical Applications	Oil (Fuel, Lube, Seal, Etc) Acids, Caustics, Corrosives

PVC

The PVC shield is manufactured from two heat-sealed layers of Polyvinyl chloride laminate. This material is inherently resistant to Ultra-Violet radiation and includes a 'litmus' leak indicator patch contacted within a clear window.

Material	Polyvinyl Chloride
Typical Applications	Acid at ambient temperature

Teflon (PTFE)

Ideal for Acid / Caustic / EI15 Oil and Diesel mist prevention

The PTFE shield is manufactured from three layers of woven Teflon coated fibreglass fabric with a central Teflon scrim for strength. This material is inherently resistant to Ultra-Violet radiation. There is a litmus leak indicator patch contained within a clear Teflon window.

Material	PTFE
Typical Applications	Oil (Fuel, Lube, Seal) Acids, Caustics, Corrosives
